Objective

Keep improving as a software craftsman. Find people and environments that provide good fellowship and meaningful outputs.

Experience

2014–now	Software Engineer at AFRY Software development consultant with focus on Scala and Java. Assignments include: <ul style="list-style-type: none">• Developing Scala/Java backend services and Spark pipelines for a well known global maps service. Current assignment, since 2015.• Writing public API backend endpoints in Java for a Swedish bank.• Making the Android application for an automated animal feeding device.• Implementing new features in a gas station inspection application.• Adding invoice integration for an e-commerce application.
Spring 2014	Thesis Work at ÅF AB We developed a system that uses crowdsourcing and gamification to map urban sound environments using smartphones.
2012–2014	Computer Science Lab Assistant at Malmö University Graded student assignments and assisted during computer science lab work.
Fall 2012	Support Function at Syngenta Seeds AB Various tasks related to a software migration project. Development of a seed quality report in QlikView, migration of an Access database, writing Excel VBA scripts, and more.
Summer 2012	Web Developer Intern at 23 Gears I developed a web application that allows users to browse and create new issues using a custom interface to Jira.
2010–2012	Product Evaluation Assistant at Syngenta Seeds AB My routine tasks included data management and assisting in trial planning within the PE group. I was also deeply involved in various statistical projects within the plant breeding group.

Education

2011–2014	Bachelor of Science in Engineering, Computer Engineering, Malmö University Focus on courses in computer science.
2002–2008	Degree of Master of Science in Environmental Science, Lund University In my thesis work I evaluated several biomass models for crayfish stock assessments, see http://goo.gl/DtSNY .
